

We are the largest manufacturer of expanded metal mesh and expanded metal mesh products in the Czech Republic. We are producer and thanks to that we can quickly respond to the demands and operatively solve customer requests.

The company's priorities include meeting customer requirements for delivery of products in the required quality, agreed time, quantity and at competitive prices, environmental protection, energy management, safety and health protection of employees.

In order to meet these requirements, we have a quality management system in place and the company management has declared the following

## QUALITY POLICY

which is enforced through the following principles:

- to deliver the ordered quantities on the agreed date and in the required quality, to expand the product range according to customer requirements and to increase the reliability of the company as a supplier
- to actively promote the introduction of new technologies that will benefit our customers and our organization, and to give preference to energy-saving technologies and equipment where there are multiple choices
- priorities defect prevention over defect detection and pursue a zero defect strategy
- prevent accidents, ensure safe operations and protect the health of our employees through effective prevention
- comply with the requirements of the legislation on occupational health and safety and fire protection and lead employees to consciously observe technological and work discipline
- maintain technical equipment in a state of safe technical competence by consistently carrying out preventive inspections of workplaces and technical equipment, preventive maintenance
- reduce process safety risks through technical and organizational measures
- to protect the environment through its business activities, to reduce the negative impact of production on human health, the environment and property in a preventive manner
- reduce the amount of waste generated and increase the proportion of its recovery in accordance with the principles of circular economy
- reduce energy consumption, evaluate and review energy consumption in order to continuously reduce the energy consumption of operations, purchase energy efficient products and services
- communicate and cooperate with local authorities, the public and customers to create a good corporate image
- protect its own and its customers' information, automatically back up company data, comply with the system of access rights according to the sensitivity of the information processed

- motivate employees to improve:
  - qualifications and expertise
  - awareness of responsibility for product quality and safety
  - awareness of responsibility for their health, the health of fellow employees and the working environment
  - awareness with the aim of prevention aimed at reducing environmental pollution
  - awareness of the need to manage energy efficiently and to avoid energy waste

#### **Management expects from employees:**

- a responsible approach to the performance of all assigned tasks
- compliance with documented company procedures and regulations
- active participation in the process of product quality improvement leading to the achievement of targets and cost reduction at all sites
- not to waste energy resources at workplaces, to reduce the amount of waste produced, to sort waste carefully
- work in a manner that does not endanger their health and the health of their fellow employees

#### **The company's management is committed to:**

- adhere to the above principles
- to comply with the relevant requirements of laws and regulations
- to continuously improve the quality management system
- ensure the availability of information and the necessary resources and measures to achieve the objectives and energy targets and to improve the energy management system
- promote the purchase of energy efficient products and services
- check knowledge of and compliance with safety regulations as an integral part of the verification of staff qualifications

This quality policy is further elaborated into quality objectives. Verification of compliance with the quality policy and quality objectives is carried out as part of the regular review of the quality management system.
